

ATLAS + FYNE™

ISOFLARE™ SERIES

FS PREMIUM SURFACE MOUNT LOUDSPEAKERS

The IsoFlare™ FS is a wide bandwidth, high sensitivity surface mount loudspeaker designed for the ultimate in fidelity, coverage, and aesthetics. The IsoFlare™ FS range is the new benchmark in point source technology for prestigious commercial environments. Decades of experience from acoustic and mechanical engineers specializing in this technology have honed existing skills, complemented with the very latest in design & engineering techniques to bring IsoFlare™ to the premium commercial space in an integrated package.

FEATURES/BENEFITS

Proprietary IsoFlare™ Driver Technology

Point source technology where low and high frequency drivers share a common center providing outstanding stereo imaging. Even off axis, energy is radiated isotropically with constant directivity, following the flare of the driver cone.

Fluted Surround Technology

Variable geometry within the Comsol Multiphysics Computer Aided Design eliminates mis-termination effects, reduces coloration, and provides greater musical accuracy.

Mounting Options

Wide range of mounting options for even the most challenging spaces.

Premium Crossover Components

The highest grade components such as low loss LF laminated core inductors, non-inductive thick film resistors, and HF polypropylene capacitors provides highly transparent signal transfer for more accurate sound reproduction and increased durability.

Full Bandwidth Low Insertion Loss Transformer

70/100V transformer offers improved audio fidelity by minimizing signal degradation. This ensures accurate reproduction of sound across the entire frequency spectrum resulting in enhanced clarity and detail.

All Weather

All-weather and UV rated for premium indoor and outdoor performance.
